Platinum Program

PLATINUM skincare solution utilising 'PLASMA' technology

'PLASMA'?

PLASMA is the fourth state of matter which is in the form of ionised gas state. When energy is applied to a gas, it separates into electrons and ions, gaining electrical energy. In natural phenomena, the appearance of plasma can be observed in events like auroras and lightning. Plasma care refers to non-invasive devices utilising plasma phenomena to evenly target surface of the skin and deep dermal layer of the skin.

PLATONING: Effectively inhibits acne causing bacteria, providing excellent anti inflammatory and antibacterial effects. It stimulates fibroblast cells, aiding in collagen and elastin synthesis for improving skin elasticity, lifting, and skin regeneration. This treatment allows the product to absorb more effectively. Additionally, it suppresses melanin cells whilst exfoliating superficial layer of the skin, resulting in a brightening effect.

MULTIPLA: An anti-ageing care device that utilises Fraxel plasma technology to deliver plasma energy from the epidermis to the dermis. It offers remarkable effects on elasticity, lifting, as well as addressing pigmentation, shrinking pores, softening a acne scars, and wrinkles.

SINGLEPLA: Designed to precisely target small areas such as ageing spots, freckles, as well as removing skin tags.

PLATONING + LHALA PEEL (1-Day Programme): PLATONING effectively brightens the skin tone and disinfects inflammatory properties. In conjunction with LHALA PEEL, it boosts the effect of improved skin tone, texture, and elasticity.

PLATONING + SINGLEPLA (1-Day Programme): PLATONING improves skin tone and texture whilst exfoliating superficial layer of the skin. Singlepla effectively removes warts, skin tags and moles.

PLATONING + MULTIPLA (2 Weeks Programme): PLATONING offers brightening and acne-disinfecting effects, while MULTIPLA addresses concerns such as pore size, scars, elasticity, and pigmentation.

MULTIPLA + SINGLEPLA (3 Weeks Programme): The combination of MULTIPLA and SINGLEPLA offers pore tightening and acne scar treatment, reducing skin pigmentation, and improving skin elasticity.

PLATINUM (PLATONING + MULTIPLA + SINGLEPLA, 3 Weeks Programme): The Platinum programme introduces all THREE modes, offering a range of different anti-ageing effects.

PLATONING can be performed once a week, while MULTIPLA and SINGLEPLA can be scheduled every 2-4 weeks depending on your skin recovery process. Post-treatment is always followed by hydration and skin cell regenerative treatment.
